Index to A.S.M.E. Transactions

Volume 60, 1938

The A.S.M.E. Transactions for 1938 was issued monthly, four of the twelve issues being the *Journal of Applied Mechanics*, the page numbers for which are preceded by the letter A.

Each paper in the other eight issues is given a letter symbol (appearing at the top of the page) which identifies the Division or committee sponsoring it. The key to the symbols follows: AER (Aeronautics), FSP (Fuels and Steam Power), HYD (Hydraulics), MSP (Machine-Shop Practice), MAN (Management), MH (Materials Handling), OGP (Oil and Gas Power), PME (Petroleum Mechanical Engineering), PRO (Process), RR (Railroad), RP (Research), and TEX (Textiles). These symbols are accompanied in each case by the volume number of Transactions and the number of the paper; i.e., HYD-60-1 indicates the first paper sponsored by the Hydraulic Division to be published in volume 60 of Transactions.

The Record and Index for the year 1938 was issued as supplements, one in February, one in October, 1938, and one in January, 1939. The page numbers for these supplements are designated by the symbol RI.

(BR) denotes book review; (D), discussion of a paper.

The abstracts in the September issue of the *Journal of Applied Mechanics* are not cross-indexed.
